Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claimed invention is directed to an acetabular component, comprising: an acetabular articulating component having a hemispherical shape and an inner surface forming at least a partial spherical cavity adapted to receive a femoral ball; an acetabular constraining component connected to the articulating component and having a spherical surface that is adjacent the inner surface to enlarge the spherical cavity to be more than a hemisphere to partially capture the femoral ball; and a locking mechanism formed on both the articulating and constraining components to removeably connect the

constraining component to the articulating component ; wherein constraining component has a semi-circular shape from a bottom view. Claim 16 defines the constraining component as being semi-circular and wedge shaped. The art fails to disclose or teach in combination a semi-circular constraining component in combination with an articulating component that serves to partially capture the femoral ball and a wedge shaped semi-circular constraining component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
